Summary

I am a software developer with practical experience and training in Artificial Intelligence, Big Data, and application development. I specialize in technologies such as Python and language models (LLM), with training in .NET, Android, JavaScript, and related technologies. I stand out for combining creativity and logic, allowing me to approach problems from innovative and structured perspectives. I am familiar with agile methodologies and SOLID principles, and my B2 English level enables effective communication in international teams. I am ready to contribute to challenging projects, both in Spain and abroad, and to work in dynamic, agile environments.

Experience

Artificial Intelligence Intern
Accenture – 03/2024 – 05/2024

- Implementation of **Lambda Functions** for automating test case generation.
- **Prompt Engineering**: Designed and optimized document queries and pre-prompts to improve accuracy in language models.

Android Developer
PadelManager – 03/2023 – 06/2023

- Developed **UI views** following **MVVM patterns**.
- Integrated **backend communication** via **REST APIs** and conducted tests on emulators and physical devices.

Education

Master in Artificial Intelligence and Big Data
CPIFP Alan Turing – 2023 – 2024

Higher Technician in Cross-Platform Application Development
IES Portada Alta – 2021 – 2023

Technical Skills

- **AI/Big Data**: TensorFlow, Keras, PyTorch, Scikit-learn, Hadoop, Spark, MongoDB.
- **Cloud**: AWS, Azure.
- **Web**: HTML, CSS, JavaScript.
- **Android**: Java, Kotlin, REST API, Firebase.
- **C#**: Unity, .NET Core/ASP.NET (MVC).
- **LLM/APIs**: OpenAI API, Pinecone, LangChain.

Languages and Certifications

- **Spanish**: Native | **English**: B2 (Cambridge).
- **Certifications**: PCEP – Python, B2 Cambridge, Driving License B.
